## **Experience**

### **NNG LLC – 2016-2020**

Being a frontend developer at the Product Prototyping team, my main task was to develop applications for pre-sale purposes and trade show demonstrations. I was working closely with UX designers to prepare and implement user-friendly interfaces. I was foreseeing solutions from a wide tech stack with an eye on performance and cross-platform compatibility while working in an agile team.

### **BCM MERNOKI IRODA – 2014-2016**

My main task at the company was providing clean and reusable markup and presentation for web. My aim was to enhance the company's visual identity by creating quality mockups and prototypes and implementing them.

## **Education**

Budapest University of Technology and Economics (BME) – Electrical Engineering BSc  
2017
